SUMMARY

Computer Science graduate with knowledge of software development, web technologies, and mobile application development. Skilled in applying technical concepts through projects and collaborative learning experiences. Possesses strong analytical thinking, problem-solving abilities, adaptability, and a passion for learning new technologies while contributing to innovative software solutions.

EDUCATION

Vivekananda College of Engineering and Technology, Puttur B.E. in Computer Science CGPA: 8.44	2022 – 2026
Jawahar Navodaya Vidyalaya, Mudipu — 12th (PCMB), CBSE Percentage: 87.6%	2022
Jawahar Navodaya Vidyalaya, Mudipu — 10th, CBSE Percentage: 87%	2020

SKILLS

Languages:	JavaScript, Java, C, SQL, HTML, CSS
Frontend:	React.js, Responsive Design
Backend:	REST APIs, Firebase Realtime Database, Firebase Auth
Mobile:	Android Studio, Java-based Android Development, IoT Integration
Tools:	Git, GitHub, VS Code, Postman
Soft Skills:	Problem Solving, Analytical Thinking, Adaptability

INTERNSHIP EXPERIENCE

Full Stack Development Intern — InvenTeron Technologies and Business Solutions LLP	2026
- Completed hands-on training in full-stack web development, working on responsive web applications using HTML, CSS, JavaScript, and backend technologies in a collaborative development environment. - Participated in software development lifecycle activities including requirement analysis, coding, debugging, testing, API integration, and version control while contributing to real-world projects.	

PROJECTS

Expense Splitter for Groups	2026
- Developed a responsive web application for managing shared group expenses, enabling multiple users to track contributions, categorize expenses, and automate settlement calculations efficiently. - Implemented a PDF report generation feature using jsPDF, enabling users to export a clean summary of all group transactions and settled balances for record-keeping.	
Helmet-X: The Future of Intelligent Protection	2025
- Designed and built a smart helmet system integrated with IoT sensors that automatically detects accident impact events and triggers an emergency response by sending real-time GPS location and alert notifications to pre-configured emergency contacts. - Developed a companion Android application that allows users to configure emergency contact numbers, view live location data, and manage helmet settings — all synced in real time through Firebase. - Integrated Firebase and GPS-based tracking to enable real-time accident detection, location sharing, and emergency alert management.	
Regional Agriculture Product Marketplace	2024
- Built an Android marketplace application that directly connects farmers with buyers, eliminating intermediaries and enabling farmers to list produce, set prices, and communicate with buyers — resulting in better profit margins for farmers. - Implemented Firebase Realtime Database and Authentication to manage product listings, user accounts, and real-time buyer-seller interactions efficiently.	

CERTIFICATES

- Tata Cybersecurity Analyst Job Simulation – Forage
- Database and SQL – Infosys Springboard
- AI-first Software Engineering – Infosys Springboard
